### **Listing of Claims with Text**

- Claim 1. (Cancelled) A warning sign comprising first and second parts pivotably interconnected at their in use upper ends and pivotable between a first storage position in which the first and second parts are arranged in side-by-side relationship and a second operative position in which the first and second parts are at an angle to one another, detent means for releasably retaining the first and second parts in the second operative position, and a third part releasably supportable by the detent means.
- Claim 2. (Cancelled) A warning sign as claim in Claim 1, wherein the two parts have ground contacting foot portion at their in use lower ends, so that, with said foot portion or portions of one part spaced from said foot portion or portions of the other part, the sign will be self-supporting on the ground.
- Claim 3. (Cancelled) A warning sign as claimed in Claim 1 or Claim 2, wherein the detents means comprises at least one projection and at least on corresponding aperture or recess, the projection being arrange to fit in the aperture or recess as a snap or friction fir when the first and second parts are in the second operative position.
- Claim 4. (Cancelled) A warning sign as claimed in Claim 3, wherein the first and second parts each have one said projection which cooperates with one said corresponding aperture or recess formed in the other part.

- Claim 5. (Cancelled) A warning sign as claimed in Claim 3 or Claim 4, wherein the third part includes a support portion having one or more openings dimensioned to receive a corresponding said production therethrough.
- Claim 6. (Cancelled) A warning sign as claim in Claim 5, wherein the or each opening in the third part is a through-hole.
- Claim 7. (Cancelled) A warning sign as claimed in Claim 5 or Claim 6, wherein the said projection can only be inserted into the corresponding opening of the third part when the first and second pars are in the first storage position.
- Claim 8. (Cancelled) A warning sign in any one of Claims 5 to 7, wherein the said projection can only be removed form the corresponding opening of the third part when the detent means is released.
- Claim 9. (Cancelled) A warning sign as claimed in Claim 5, wherein the or each opening in the third part is a recess formed in an edge of the third part.
- Claim 10. (Cancelled) A warning sign as claimed in Claim 9, wherein at least one said recess is keyhole shaped so as to be snap-fit engageable with the said projection of the detent means.
- Claim 11. (Cancelled) A warning sign as claimed in Claim 9 or Claim 10, wherein the third part, in use, in engageable with and disengageable from the projection of the detent means, when the first and second parts are in the first storage position and the second operative position.

- Claim 12. (Cancelled) A warning sign as claimed in any one of the preceding claims, further comprising a fourth display part releasably engageable with the third part.
- Claim 13. (Cancelled) A warning sign as claimed in Claim 12, wherein the third part includes an elongated channel in which the bottom end of the fourth display part is receivable.
- Claim 14. (Cancelled) A warning sign as claimed in Claim 12, wherein the third part comprises two members, each member including an elongate channel in which a side of the fourth display part is, at least in part, receivable.
- Claim 15. (Cancelled) A warning sign as claimed in Claim 12, wherein the third part includes a transparent holder for holding the fourth display part.
- Claim 16. (Cancelled) A warning sign as claimed in Claim 15, wherein the transparent holder is a sleeve into which the fourth display part can be slidably inserted.
- Claim 17. (Cancelled) A warning sign substantially as hereinbefore described with reference to the Figures 1 to 3, Figure 4, Figure 5, or Figure 6 of the accompanying drawings.

- Claim 18. (Added) A warning sign comprising first and second parts pivotably interconnected at their in use upper ends and pivotable between a first storage position in which the first and second parts are arranged in side-by-side relationship and a second operative position in which the first and second parts are at an angle to one another, detent means for releasably retaining the first and second parts in the second operative position, and a third part releasably supportable by the detent means.
- Claim 19. (Added) A warning sign as claim in Claim 18, wherein the two parts have ground contacting foot portion at their in use lower ends, so that, with said foot portion or portions of one part spaced from said foot portion or portions of the other part, the sign will be self-supporting on the ground.
- Claim 20. (Added) A warning sign as claimed in Claim 18, wherein the detents means comprises at least one projection and at least on corresponding aperture or recess, the projection being arrange to fit in the aperture or recess as a snap or friction fir when the first and second parts are in the second operative position.
- Claim 21. (Added) A warning sign as claimed in Claim 20, wherein the first and second parts each have one said projection which cooperates with one said corresponding aperture or recess formed in the other part.

- Claim 22. (Added) A warning sign as claimed in Claim 20, wherein the third part includes a support portion having one or more openings dimensioned to receive a corresponding said production therethrough.
- Claim 23. (Added) A warning sign as claim in Claim 22, wherein the or each opening in the third part is a through-hole.
- Claim 24. (Added) A warning sign as claimed in Claim 22, wherein the said projection can only be inserted into the corresponding opening of the third part when the first and second pars are in the first storage position.
- Claim 25. (Added) A warning sign as claimed in Claim 22, wherein the said projection can only be removed form the corresponding opening of the third part when the detent means is released.
- Claim 26. (Added) A warning sign as claimed in Claim 22, wherein the or each opening in the third part is a recess formed in an edge of the third part.
- Claim 27. (Added) A warning sign as claimed in Claim 22, wherein at least one said recess is keyhole shaped so as to be snap-fit engageable with the said projection of the detent means.
- Claim 28. (Added) A warning sign as claimed in Claim 26, wherein the third part, in use, in engageable with and disengageable from the projection of the detent means, when the first and second parts are in the first storage position and the second operative position.
- Claim 29. (Added) A warning sign as claimed in claim18, further comprising a fourth display part releasably engageable with the third part.

- Claim 30. (Added) A warning sign as claimed in Claim 29, wherein the third part includes an elongated channel in which the bottom end of the fourth display part is receivable.
- Claim 31. (Added) A warning sign as claimed in Claim 29, wherein the third part comprises two members, each member including an elongate channel in which a side of the fourth display part is, at least in part, receivable.
- Claim 32. (Added) A warning sign as claimed in Claim 29, wherein the third part includes a transparent holder for holding the fourth display part.
- Claim 33. (Added) A warning sign as claimed in Claim 32, wherein the transparent holder is a sleeve into which the fourth display part can be slidably inserted.
